

AM Beats

the right playlist of songs from the band 'Arctic Monkeys' by monitoring your heart's reaction to the songs played by the app.

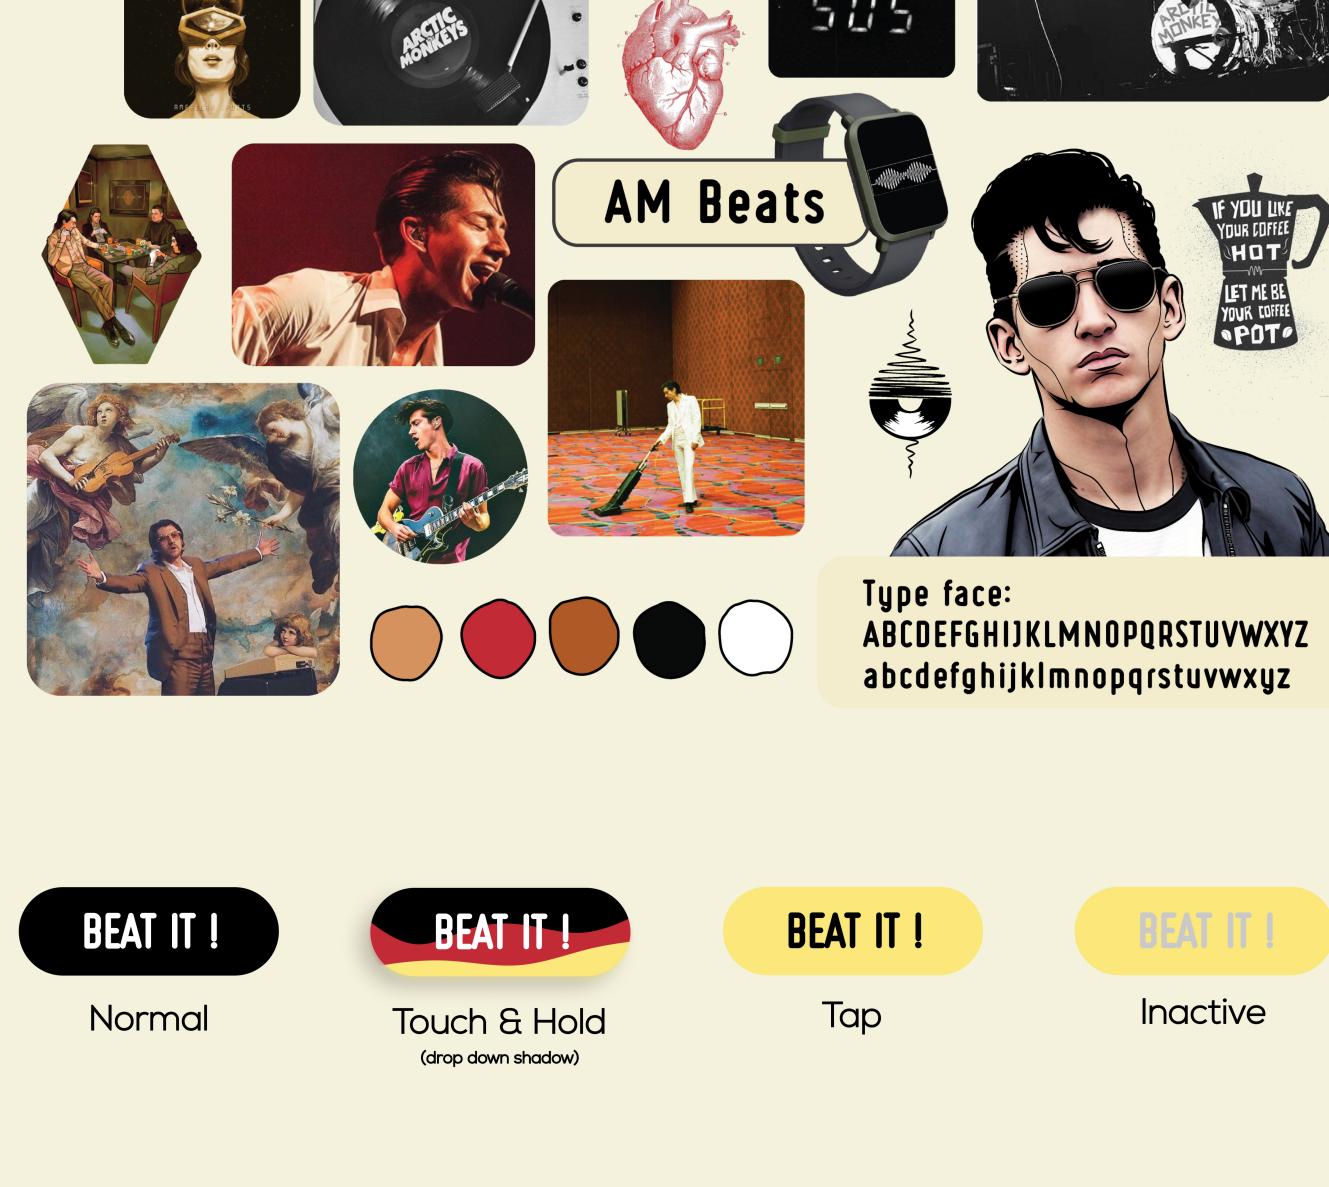

Listen to the beats your heart has got for you !

The user needs to link his smart watch to the app

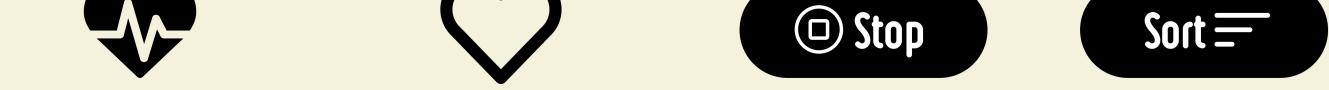

When he logs in to the app which plays the bar 10 songs and actively monitors the user's heart and his/her's reaction to the songs. After the

gathers the data it creates a playlist uniquely for that user. When the user listens to that playlist the app will start monitoring the behaviour of the user's heart again meaning the playlist keeps on improving in favour of the user. The user can also create different playlists based on moods from the data it keeps on gathering the heart's reaction actively 'coz the heart wants what it wants.
